Overall Length:

22.700 inches

Overall Diameter:

1.850 inches

Accessory Components And Quantity:

Standard restrictor 1

Voltage In Volts And Current Type:

12.0 dc

Product Name:

Multi-parameter water quality system with data logging

Special Features:

Multi-parameter system having 4 sensor ports for quick basic measurements of surface water; for measuring optical dissolved oxygen-rdo; dissolved oxygen-polarographic; conductivity, sc, tds, resistivity; temperature; ph; orp; ph/orp; salinity; level, depth, pressure; barometric pressure; has replaceable sensors; high accuracy calibration

Material:

Plastic and stainless steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
