Accessory Components And Quantity:

Foam rack insert with holes for vials, 1ea

Product Name:

Carrier cooler thermosafe insulated nylon duo-temp lock

Special Features:

Weather resistant thermal coolers for transport of field specimens and samples. 140338 include removable u-tek refrigerant gel packs that secure in the lid. A fold-out partition allows separation of fragile samples into two different temperature compartments when the cold pack is used on one side. Proper temperature ranges can be maintained for hours. Use as a single large chamber when the partition is folded back. Includes a lock built into the zipper and two keys, sewn-in hasp for attachment of tamper-evident seals, adjustable carrying straps. No. 140338 is a flexible polyurethane foam rack insert with 24 holes for securing 16 20mm vials

Material:

Plastic nylon

Supplementary Features:

Duo-temp locking with rack

Shelf Life:

N/a
