Storage Temperature Range:

+0.0/+7.0 degrees celsius

End Application:

6640-01-543-6980 incubator, bacteriological

Approximate Shelf Life:

0.5 years

Product Name:

Swab kidney inhibition count 25s

Special Features:

Single use, disposable swab test; detects antibiotics in kidney tissue at slaughter facilities; test reagents are premeasured, solvent free, contained in swab; for use with end item bacteriological incubator, 2 ml vials, 8 place, 6640-01-543-6980; package of 25

Functional Description:

Inhibition test to screen for broad spectrum antimicrobial drugs in fresh or thawed kidney tissue using a disposable swab format

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
