End Application:

Model hga600 graphite furnace; atomic spectroscopy

Product Name:

Matrix modifier for graphite furnace aa

Functional Description:

Single element technique in atomization

Supplementary Features:

MsdS states hazard description-not applicable; cas no. 7732-a8-5 water; einecs 231-791-2; mix 2.5 to 10percent diammonium hydrogenorthophosphate with nonhazardous additio (water 50 to 100percent)

General Description:

10percent nh₄h₂po₂; 100ml; ready-to use; for graphite furnace aa

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
