Accessory Components And Quantity:

Microsprayer aerosolizer model ia-1c-m and the fmj-250 high pressure syringe

Product Name:

Microsprayer syringe assembly msa-250-m for mouse

Functional Description:

Administer a precisely quantifiable, highly-concentrated, air-free plume of liquid aerosol directly into the lungs or other locations; aerosolize: wide range of liquids or particle solutions/suspensions, including pharmaceutical and biological formulations, contrast/imaging agents and toxicological materials (cannot do dry powders)

Material:

Stainless steel

General Description:

Aerosolizer: 120 deg. Bend; length of intratracheal portion: 1.25 in.; tip is rounded; outer diameter: 0.025 in.; very tip diameter: 0.028 in.; innerdiameter: 0.017 in.; re-usable/sterilizable; syringe: operates at up to 3000 psi; hub 1/4-28 tip (not luer hub); max. Capaci type 250 microliters; re-usable/sterilizable

Type/model Designation:

Msa-250-m

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
