Mounting Type:

Desk, portable and table

Unit Package Quantity:

1

Recorder Printout Type:

Day of month and year and hour and minute and time

Recording Position:

Vertical

Printed Color Quantity:

1

Document Positioning Type:

Manual in-out card

Printing Mechanism Actuation Method:

Electrical

Primary Circuit Drive Type:

Synchronous motor

Primary Circuit Voltage:

120.0 ac

Primary Circuit Frequency:

60.0

Primary Circuit Phase:

Single

Supervising Circuit Drive Type:

Synchronous motor

Supervising Circuit Voltage:

Between 115.000 ac and 120.000 ac

Special Features:

This model prints upside down.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T270-e
