Mounting Type:

Surface

End Application:

Outboard motors, fourstroke, mercury and mariner with horsepower ratings - 4.0, 5.0, 9.9, 15.0, 25.0, 30.0-40.0 (3 cylinder manufactured before 2004), 40.0, 50.0, 60.0 (4 cylinder manufactured from 2001 through 2004) and 225.0

Indicator Type:

Digital counter

Measurement Unit:

Hours and minute and revolutions per minute

Unit Type:

Mounted

Movement Type:

Electronic

Smallest Increment Indicated:

1.00

Reset Feature:

Provided

Maximum Measurement:

9999.00

Product Name:

Service monitor

Special Features:

When engine is running, displays engine revolutions per minute (rpm); when engine is not running, displays run time of engine; mounted using 2 sheet metal screws through unthreaded holes in tabs at either end of meter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T134-r
