**End Application:**

5975-01-407-4633, part number tsc-2003, chassis electrical-electronic equipment

**Special Features:**

The tsc 2054 six channel timer performs the timing measurements for pulse signals with respect to an internal timebase created from a 5 mhz reference; the unit provides sub-nanosecond resolution on rising edge measurements on each of six inputs; time differences can be computed between any pair of channels (software required); internal timebases between multiple tsc 2054 modules can be synchronized using an external 1 pps signal via the 1 pps input; specifications- width 1 slot; connectors-input: 8 sma female connectors; resolution 1 ns; power 5w; input impedance 50 ohm

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T270-d
