Diameter:

0.8290 inches

Angle In Deg:

45.0

Axial Thickness:

0.120 inches

Refraction Index:

1.5838

Dispersion:

46.0 angstroms

Rim Finish:

Ground

Graduations/markings:

Range scale

Special Features:

0.0150 in. Bevel depth

Material:

Glass optical

Style Designator:

Vertically graduated

Supplementary Features:

Material optical glass per jan-g-174, grade c, type 523-586 and 584-460

Fsc Application Data:

Telescope, panoramic, integrated with fire control equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A530t0
