Assembly Method:

Bonded

Special Features:

Consists of holder, p/n 7659744, and prism assembly, p/n 11726353; temperature test: after exposure to ambient temperature of minus 80 degrees f. For five hours and return to room temperature; surface quality of transmitting surfaces to be 40-20; surface quality of reflecting surfaces and cemented interface to be 60-40

Quantity:

1

Style Designator:

Wedge type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T271-m
