General Description:

Full scale for refractive index is 1.3330 to 1.3730 for salinity, 0-160 ppt 0/00, refractive index is read directly to .0002, easily estimated to .0001, no set up time required, no more than one drop of solution is needed 0.02 ml, hand type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/ml

Fiig:

A23900
