General Description:

Wavelength range 200-800 nm, scanning speed from 90-270 sec variable, variable spectral slit widths 0.1-5 mm, 1p21 photomultiplier tube, fluorescence intensity displayed on photometer dial, output jacks for recorder and oscilloscope; 115 vac, 50/60 hz, 290 w

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
