Width:

Between 0.050 inches and 0.070 inches

Overall Diameter:

1.720 inches

Overall Thickness:

Between 0.050 inches and 0.070 inches

Density Variability:

Variable

Special Features:

Transmittance at 550 nonometers with 0 degrees incident light shall be 12 pct to 13.2 pct; transmittance over wave length range 400-700 nanometers 11-14 pct. Nickel alloy.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T205-a
