**General Description:**

Acquires and digitises the signal from the spectrum analyser head in 5msec every 80 msec w/0.5 nm sampling points over the whole spectrum from 200-1100 nm; analogue signal from spectrum analyzer is digitised by 12 bit adc at 0.5nm, 1nm, or 2nm intervals

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
