Width:

2.500 inches

Thickness:

0.125 inches

Length:

2.500 inches

End Application:

4935-01-150-0071, test set, control

Reflective Backing Material:

Aluminum and silicon

Special Features:

Flatness: 2 fringes at 0.63 microns wavelength within inscribed circle to 0.125 of edge of coated side; firstsurface reflector, min 96 pct reflecting 2-5 micron spectral region

Material:

Glass, borosilicate

Material:

Glass, borosilicate

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T271-f
