Diameter:

4.062 inches

End Application:

4935-01-150-0071, test set, control

Reflective Backing Material:

Aluminum and silicon

Special Features:

Off-axis parabolic mirror collimating accuracy 0.1 milliradians; maximum blur circle diameter 0.06 milliradian for 95 pct energy visible wavelength; surface 60-40 polish; focal length 25.00 porm 0.05

Material:

Glass, borosilicate

Material:

Glass, borosilicate

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T271-f
