Ac Voltage Rating:

115.0 volts

Frequency Rating:

60.0 hertz

Major Components:

Elliptical reflector, dielectric heat removing mirrors, multielement optical integrator system and collimating optics

Electrical Power Source Relationship:

Operating

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Ultraviolet (uv) light source calibrator

Operating Test Capability:

350 nanometer (nm) to 450 nanometer(nm) spectral band

Product Name:

Uvcalibrator system

Phase:

Single

Special Features:

Includes model 1000 uv power meter, model 55b digital shutter controller, model ls90-nafb light source system with ozone eater, and model ha-sa power supply; for use in af pmel labs, constant power, p1-2t precision, adjustable +/- 15% rated power, exposure cycle time 1/999.9 sec

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
