Width:

17.5 millimeters

Diameter:

15.0 millimeters

End Application:

Battlefield reconfigurable for teest of electro-optics (brite) system

Usage Design:

Alignment of laser optics

Axial Thickness:

2.0 millimeters

Graduations/markings:

Concentric circle

Material:

Quartz

Style Designator:

Special design

Supplementary Features:

Wavelength: 830.0 nm; retardation: .500 waves porm .002; construction: airspaced; surface quality: 20/10; a/r coating: v coat at selected wavelength; wavefront distortion: 1/10 wave; clear aperature: 15 mm; laser power: 500 mwatts/cm2 in 5nsec pulse

Fsc Application Data:

Electro-optical test set

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A530t0
