Width:

25.0 millimeters

Length:

140.0 millimeters

End Application:

Used for testing an/alq-214

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Included

Material And Location:

Plastic, phenolic housing

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Provides for measurement of insertation loss and attenuation of fiber optic circuit

Operating Test Capability:

3 to -60 dbm at 850/1300/1550nm

Special Features:

Optical power meter, nist certifiably, connector interface (soc series)4 digit led

Height:

60.0 millimeters

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
