Overall Length:

31.000 inches

Overall Height:

67.000 inches

Overall Width:

31.000 inches

End Application:

Particle analysis of oil for f110-ge-100 & f110-ge-129 engines

Model Number:

Jetscan

Special Features:

Integral wheel mounted case with slots for forklift. 1 hour setup and calibration. Software installed for specific jet engines - f110-ge-100 and -129

Functional Description:

Scanning electron microscope proven off-line microscopic analysis of the magnetic chip detector debris & indicates whether maintenance is required based upon the quantity, size, & material type of the debris

Reference Data And Literature:

Serd & commercial data

Relationship To Similar Equipment:

REPL-AC-EME-NTFO

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
