End Application:

Continuum infrared microscope, main body

Usage Design:

Any acceptable

Design Type:

Research model

Body Tube Position:

Vertical

Special Features:

Infinity corrected optics; motorized pre and post sample masking aperture with x, y, and 0 control; 50 watt illumination with intensity and contrast control; motorized sample and condensor focus control; integral contact alert electronics; dual detector upgradeable; purge system including purge regulator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T271-c
