Accessory Components And Quantity:

Data card reader 1, surge protection 1, lcd monitor with optional glare protection 1, 60 watt light source 1, spare lamp 1, storage/carrying case with insertion tube/probe storage 1, working channel tools 4, snare basket 1, 3 pronggrabber 1, magnet 1, interchangeable tips 2, external re-measurement software 1, internal measurement software 1, certificate of calibration 1, calibration check block 1

Special Features:

6 mm diameter 4 way articulate tip, 3.0 working length, insertion tube probe tips with changeable tip, direct view far and near, side view near and far, direct view measuring tip, side view measuring tip, operating probe temp requirement c n25/p80, system operating temp c m20/p46, explosion proof class 1, measures inch or mm, liquid proof case with handles and/or rollers

Functional Description:

Nondestructive inspection of internal components aircraft engines

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
