Overall Length:

3.7000 inches

Overall Width:

1.1000 inches

Overall Thickness:

0.117 inches

End Application:

C17 aircraft

Product Name:

Filter, optical, night vision imaging system (nvis) compatible, yellow

Special Features:

At +25 degrees c dominant wavelength 585 nanometer, photopic transmittance normal to face of filter 4.7%, transmittance tolerance 1-20%, nvis radiance $\geq 1/4 \times 10^{-11}$, free of surface flaw, antireflective front surface, salt-fog atmosphere 5% 95 degrees f 48 hrs, operating temp -40/+55 c, 100% humidity, non-nutrient to fungus, fire resistant, glass and plastic composition

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T205-a
