Product Name:

Nd-1000

Special Features:

Designed for 1 ul samples; measures 2-3700 ng/u (dsdna) on a single sample, no need to change out cuvettes or caps; high absorbance capability: 50 times that of traditional; no dilutions for most samples; no extra costs for consumables; full spectrum(220-750nm) ; 10 second measurement time; no cuvettes or capillaries; sample is recoverable; size of a tissue box; plug and play; software designed for life sciences; free software upgrades

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/ml

Fig:

T271-d
