Major Components:

Simplifiber power - meter and 850/1300 source

Accessory Component Quantity:

4

Electrical Power Source Relationship:

Operating

Test Type For Which Designed:

Optical loss and power levels

Operating Test Capability:

Optical loss and power levels at 850 nm and 1300 nm

Product Name:

Basic fiber verification kit

Special Features:

Starter kit for installing and maintaining multimode fiber optic links

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
