**Major Components:**

Simplifiber power - meter and 850/1300 source

**Accessory Component Quantity:**

4

**Electrical Power Source Relationship:**

Operating

**Test Type For Which Designed:**

Optical loss and power levels

**Operating Test Capability:**

Optical loss and power levels at 850 nm and 1300 nm

**Product Name:**

Basic fiber verification kit

**Special Features:**

Starter kit for installing and maintaining multimode fiber optic links

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T228-a
