End Application:

This is a product that we manufacture, and the cage code is correct. The problem is that the xlgo videoprobe is a product line, not a specific piece of equipment. We make various models of the xlgo video videoprobe; we have different insertion tube diameters, and different lengths of the insertion tube.

Component Quantity:

1

Supply Items And Quantities:

Optional 4 hour battery. Ac battery charger, 4gb thumb drive, tube gripper, optical tube case, ball joint, handset holder, mini magic clamp, rigidizer, operating manual, case.
