Usage Design:

Chemistry

Design Type:

Research model

Body Tube Position:

Vertical

Special Features:

Scientific grade; high-resolution kfm/efm; used for materials science, polymers, electrical characteriazaiton, general surface characterization and namolithography; large multi-purpose scanner; 90 um x 90 um x 8um scan range; small scanner; 2mm x 2mm sample plate; kinetic mount translatabe; 20mm x 20mm translation stage; ten 16-bit input channels; five 24-bit drive channels; usb interface; 100-120v or 220-240vac; 1 amp; 50-60 hz; four 24-bit output channels

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T271-c
