Product Name:

Magnetic demonstration system

Special Features:

Em-8641 consists of a base 1; neodymium magnets 2; pole pieces 2; screws 2; the em-8692a consists of a mounting rod 1; aluminium paddles 3; swing 1; glass rod 1; and aluminium rod 1

Functional Description:

For demonstrating ideas such as force on a current-carrying wire, eddy currents, paramagnetism, and diamagnetism

Relationship To Similar Equipment:

System consists of two separate part numbers combined; em-8641 a variable gap lab magnet and em-8642a magnetic force accessories

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A534a0
