Mounting Material:

Galvanized iron

Mounting Type:

Pipe

Mounting Facility Length:

5.000 feet

Scale Unit Of Measure Inscription:

Miles per hour and miles per hour and degrees

Current Type:

Dc

Dc Voltage Rating:

3.000 volts

Major Components:

Carrying case; wind panel; support; transmitter, wind

Accessory Controlling Agency:

Sig, sig, sig, sig

Accessory Identifying Number:

MI-207-b type no. And ml-204-b type no. And ml-110.B type no. And ml-203-b type no. And ml-208-a type no.

Wind Speed Component Operation Method:

Wind actuated generator

Wind Direction Component Operation Method:

Rheostat

Dial Type And Range:

+0.0/+30.0 wind speed indicator and +0.0/+150.0 wind speed indicator and +0.0/+360.0 wind direction indicator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-e
