Mounting Material:

Steel

Mounting Type:

Pipe 15 ft lg

Scale Unit Of Measure Inscription:

Miles per hour and degrees

Current Type:

Ac/dc

Ac Voltage Rating:

115.00 volts

Dc Voltage Rating:

24.000 volts

Frequency Rating:

60.000 hertz

Major Components:

Carrying case 2; cord; rectifier power unit; support; wind panel; wind transmitter

Accessory Controlling Agency:

Sig; sig; jcens; jcens; sig; sig; sig

Accessory Identifying Number:

MI-207- type no. And ml-208- type no. And ce-891/gmq-1 type no. And pp-19 () /gmq-1 type no. And ml-206- type no. And ml-204- type no. And ml-203- type no.

Wind Speed Component Operation Method:

Wind actuated generator

Wind Direction Component Operation Method:

Wind name position transmitted by synchro to indicator

Dial Type And Range:

+0.0/+150.0 wind speed indicator and +0.0/+360.0 wind direction indicator

Phase:

Single

Specification Or Standard:

No. An/gmq- () type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-e
