Accessory Components And Quantity:

Generator 1, rotor assembly 1, trigger assembly 1, vane assembly 1, wind speed transmitter

Mounting Configuration:

Bond held

Wind Speed Transmission Method:

Wind driven generator

Wind Direction Transmission Method:

Visual indication

Wind Direction Component Type:

Double-tailed vane

Wind Direction Component Material:

Aluminum alloy

Specification Or Standard:

MI-446a1pmq-3 type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-f
