Wind Measuring Set - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/6660-00-527-9676

Scale Unit Of Measure Inscription:
Calibrated in mils
Current Type:
Ac/dc
Ac Voltage Rating:
115.0 volts
Dc Voltage Rating:
24.0 volts
Frequency Rating:
60.0 hertz
Major Components:
Mast, trailer mtd transmitter, wind speed indicator, azimuth and elevation correction data anemometer, power unit
Accessory Controlling Agency:
Jetds, jetds, jetds, cercom
Accessory Identifying Number:
Ab-328a/m type no. And t-610/mmq-1 type no. And id-415a/mmq-1 type no. And ml-433/pm type no. And pe-75-af type no.
Wind Speed Component Operation Method:
Wind actuated generator
Wind Direction Component Operation Method:
Sine-cosine potentiometer
Dial Type And Range:
+0.0/+285.0 azimuth indicator and +0.0/+142.5 azimuth indicator and +0.0/+150.0 elevation indicator
Phase:
Single
Specification Or Standard:
An/mmq-1a type
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
Т206-е
