Scale Unit Of Measure Inscription:

Calibrated in mils

Current Type:

Ac/dc

Ac Voltage Rating:

115.0 volts

Dc Voltage Rating:

24.0 volts

Frequency Rating:

60.0 hertz

Major Components:

Mast, trailer mtd transmitter, wind speed indicator, azimuth and elevation correction data anemometer, power unit

Accessory Controlling Agency:

Jetds, jetds, jetds, jetds, cercom

Accessory Identifying Number:

Ab-328a/m type no. And t-610/mmq-1 type no. And id-415a/mmq-1 type no. And ml-433/pm type no. And pe-75-af type no.

Wind Speed Component Operation Method:

Wind actuated generator

Wind Direction Component Operation Method:

Sine-cosine potentiometer

Dial Type And Range:

+0.0/+285.0 azimuth indicator and +0.0/+142.5 azimuth indicator and +0.0/+150.0 elevation indicator

Phase:

Single

Specification Or Standard:

An/mmq-1a type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-e
