Special Features:

C/o transmitter grp, humidity-temp oa-1165/tmq-11; indicator id-553/tmq-11 and id-590/tmq-11; recorder ro-42/tmq-11 and ro-58/tmq-11; temp measuring range -80/+130 degrees f; dewpoint measuring range -50/+90 degrees f; sensing elements mtd in transmitter grp located up to 5000 ft cable lg from recorder or indicator; power and signal interconnection between units w/multi-conductor cables; set should be procured by components; pwr reqd 110 vac, 50/60 cycles

Functional Description:

Temp and humidity measurements continuously and automatically made at remote location and transmitted to indicator or recorder

Reference Number Differentiating Characteristics:

Special features /a/ 50 cycles, /b/ modified for use as test and/or calibration bench mock up equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
