Scale Unit Of Measure Inscription:

Miles per hour and miles per hour and degrees

Current Type:

Ac

Ac Voltage Rating:

115.00 volts

Frequency Rating:

60.000 hertz

Major Components:

Indicator; case, indicator; case, meteorological equip; transmitter, wind speed; mast, trailer mtd; power unit; barometer

Accessory Controlling Agency:

Jcens; jcens; jcens; jcens; jcens; sig; sig

Accessory Identifying Number:

Id-624/gm type no. And cy-1806/mmq-1 type no. And cy-1805/mmq-1 type no. And t-610-mmq-1a type no. And ab-328a/m type no. And pe-75-ae type no. And ml-102-g type no.

Wind Speed Component Operation Method:

Wind actuated generator

Wind Direction Component Operation Method:

Wind direction transmitted by coupled sine-cosine potentiometer to indicator

Dial Type And Range:

-50.0/+50.0 wind speed indicator and -25.0/+25.0 wind speed indicator and +0.0/+360.0 wind speed indicator

Phase:

Single

Specification Or Standard:

An/mmq-1b type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-e
