Scale Unit Of Measure Inscription:
Miles per hour and miles per hour and degrees
Current Type:
Ac
Ac Voltage Rating:
115.00 volts
Frequency Rating:
60.000 hertz
Major Components:
Indicator; case, indicator; case, meteorological equip; transmitter, wind speed; mast, trailer mtd; power unit; barometer
Accessory Controlling Agency:
Jcens; jcens; jcens; jcens; sig; sig
Accessory Identifying Number:
Id-624/gm type no. And cy-1806/mmq-1 type no. And cy-1805/mmq-1 type no. And t-610-mmq-1a type no. And ab-328a/m type no. Ar
pe-75-ae type no. And ml-102-g type no.
Wind Speed Component Operation Method:
Wind actuated generator
Wind Direction Component Operation Method:
Wind direction transmitted by coupled sine-cosine potentiometer to indicator
Dial Type And Range:
-50.0/+50.0 wind speed indicator and -25.0/+25.0 wind speed indicator and +0.0/+360.0 wind speed indicator
Phase:
Single
Specification Or Standard:
An/mmq-1b type
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
T206-e
