End Application:

Humidity temperature measuring set, an/tmq-11

Functional Description:

Acts as a resistance wheatstone bridge with its output controlling the indicator balancing motor

General Description:

Range 6300 (m 50 degrees to p 90 degrees f.; has six resistances resulting in adewpoint output indication; resistancevalues vary from m 23.892 to m 600.000ohms

Fsc Application Data:

Dew point indicator, p/n a-13793-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
