End Application:

Project no. 104, program b/20

General Description:

Set consists of digital data and control, left, 1, digital data and control, right, 1, gated chain amplifier 3, power control 7, main power control 1, main power box 1, data processor control panel 1, monitor 1, amplifiers 3, detector, sample gate, generator 1, azimuth ad converter 1, delay drivers 3, display control 1, film recorder 1, rack 7, telephone, selfpowered 2, waveform peak detector 2, waveform gate selector 1, film take/up magazine 2, film supply magazine 2, power meter panel 1, discriminator 3, threshold control 1, simulator and system control 1, camera unit 1, camera drive electronics 2, preamplifier adapter 1, wf delay line 1, digital azimuth selector 1, spectrum analyzer 1, spectrum analyzer control 1, power assembly 1, blower 8, power supply 17, matrix, driver assembly 1, df antenna assembly 1, preamplifier 2, cables assorted styles 38, projector assembly 1, focusing screen assembly 1, voltage balance box 1, card extender 1, pin, mixed 6, test box 1, antenna 3
