End Application:

Automated surface observation system (asOs), nha visibility sensor

Special Features:

Detects transmitter xenon light after it is scattered by atmosphere; detected via pin photodiode mounted in receiver cannister; c/o aluminum cylinder cannister and cap; electronics and wiring are in cannister

Functional Description:

Visibility sensor is capable of providing an extinction coefficient equivalent to visibilities up to, and including, 10 miles

Unpackaged Unit Weight:

40.000 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23800
