LIIU	$\Delta$	DIIL	,auc	,,,,

Spacelift range western weather instrumentation

## **Special Features:**

Uused to measure both atmospheric temperature structure & boundary layer wind profiles remotely; capable of measuring qualitative temperature structure & quantitave structure parameters & vector wind components from 10-100 meters

Shelf Life:

N/a

**Unit Of Measure:** 

\_\_

Demilitarization:

No

Fiig:

A23800
