Current Type:

Ac

Ac Voltage Rating:

115.0 volts

Frequency Rating:

60.0 hertz

End Application:

Automated surface observing system (asos)

Wind Speed Transmission Method:

Electrical contacts

Wind Speed Rotor Type:

3-cup rotor

Err Default:

Err default

Phase:

Single

Special Features:

Part of wind speed sensor assembly cup and vein design wind speed sensors; buyer supplies power and fiber optic cable rs-232; range 0-125 knots with perm 2 knots or 5 percent accuracy whichever is greater; resolution 1 knot; distance constant for wind speed no more than 30 feet

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-f
