**Current Type:**

Ac

**Ac Voltage Rating:**

115.0 volts

**Frequency Rating:**

60.0 hertz

**End Application:**

Automated surface observing system (asos)

**Wind Speed Transmission Method:**

Electrical contacts

**Wind Speed Rotor Type:**

3-cup rotor

**Err Default:**

Err default

**Phase:**

Single

**Special Features:**

Part of wind speed sensor assembly cup and vein design wind speed sensors; buyer supplies power and fiber optic cable rs-232; range 0-125 knots with porm 2 knots or 5 percent accuracy whichever is greater; resolution 1 knot; distance constant for wind speed no more than 30 feet

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T206-f
