**Product Name:**

Solar radio spectrograph system

**Special Features:**

Consists of 2 major subsections: antenna/mounting assembly; antenna interface assembly and the following major components located in the rstn operations building: spectrum analyzer hp 8591e, dell demension d333 computer, antenna driver unit and ethernet link to allow hookup with other rstn systems

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23800
