Product Name:

Solar radio spectrograph system

Special Features:

Consists of 2 major subsections: antenna/mounting assembly; antenna interface assembly and the following major components located in the rstn operations building: spectrum analyzer hp 8591e, dell demension d333 computer, antenna driver unit and ethernet link to allow hookup with other rstn systems

Shelf Life:

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A23800
