Overall Length:

28.000 inches

Overall Height:

28.000 inches

Overall Width:

28.000 inches

End Application:

Component of aerovironment model 4000 minisodar system

Accessory Components And Quantity:

Transducer array, 2 circuit cards

Special Features:

Main reflecting surface tilted at 45 degrees angle and is sized to allow all 3 monostatic beams minimal interference. Option area heater for inclement weather use. Drain pan. Manufacture mane: acoustic enclosure

General Description:

An open boxlike structure with a reflector surface for the acoustic signals. Shields antenna from noise and weather, provides damping of transmitted signal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
