End Application:

Stand alone weather system (saws)

Wind Speed Rotor Material:

Steel, stainless

Special Features:

Ultrasonic; fully compensated over temperature, humidity and altitude; material sensor arms: 316 stainless steel; sensor body: 6061-t6 anodized aluminum; transducer heads: silicone rubber and pvc plastic; function: wind speed and direction sensor; reference data: ti 6560.70, table8-1, pg 8-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-f
