End Application:

Maws201m tactical meteorological observation system

Usage Design:

Measures visibility, detects precipitation type, intensity and accumulation

Installation Design:

Fixed

Product Name:

Present weather detector

Special Features:

Connected to host computer via anrs-232 irs -485 serial line direct, can make remote measurement or to control variable message or traffic signs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T206-d
