Carrying Case:

Not provided

Graduation Unit:

1.000 knots and 1.000 miles per hour

Wind Speed Rotor Type:

Multibladed radial

Operation Method:

Wind speed impeller actuates counting device

Scale Range:

+0.0/+100.0 knots air speed and +0.0/+100.0 miles per hour air speed

Product Name:

Marine wind tracker-wind speed/direction display

Special Features:

230.0 volts / 50-60 hz adapter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-c
