Current Type:

Ac

Ac Voltage Rating:

Between 115.0 volts and 240.0 volts

Frequency Rating:

Between 47.0 hertz and 63.0 hertz

End Application:

An/fnq-1 (v) 2 wind measuring set

Accessory Components And Quantity:

05159-66 nose cone and prop shaftassy 1, 05154-45 housing assembly 1, 05120e-56 mounting post and transducer assembly 1, 05128b orientation ring 1

Wind Speed Transmission Method:

Ethermoelement

Wind Direction Transmission Method:

Thermoelement

Wind Speed Rotor Type:

Blade

Wind Speed Rotor Material:

Plastic

Wind Direction Component Type:

Airplane-shaped vane

Wind Direction Component Material:

Plastic

Product Name:

Wind monitor

Phase:

Single

Special Features:

Measures wind direction 0-360 degaccuracy 3 degrees signal out put dc, measurers wind speed 0-117 knots, operating temp range c degrees m62/p54, 5-100 % humidity, survives ice 0.5 in hr, rain 3 in/hr with 40 knot winds, height 14.6 inch, length 21.7 inch, replaces 6660-01-5304 pn 8111-1004-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-f
